### GOTTA-GRIP® GRIP RESTORER —

HITTING TOO MANY HOOKS AND SLICES? Chances are your mis-hits are a result of slippery, worn grips. Golfers, who on average replace their grips every five years, can virtually eliminate their grip gripes with Gotta-Grip. Tested on both leather and composite grips, this device contains a specially formulated, non-toxic, non-staining polymer that adds “tack” to the existing grip surface. By sliding the tube over each grip, and giving it a slight squeeze and twist, the clubs are given a new grip feel. Achieving peak performance at 60° (F) and higher, the lightweight grip restorer clips to a golf bag for easy on-the-course application. Gotta-Grip is designed to last many years and can also be used on tennis racquets and baseball bats. Suggested retail \$19.95. [www.gottagrip.com](http://www.gottagrip.com).

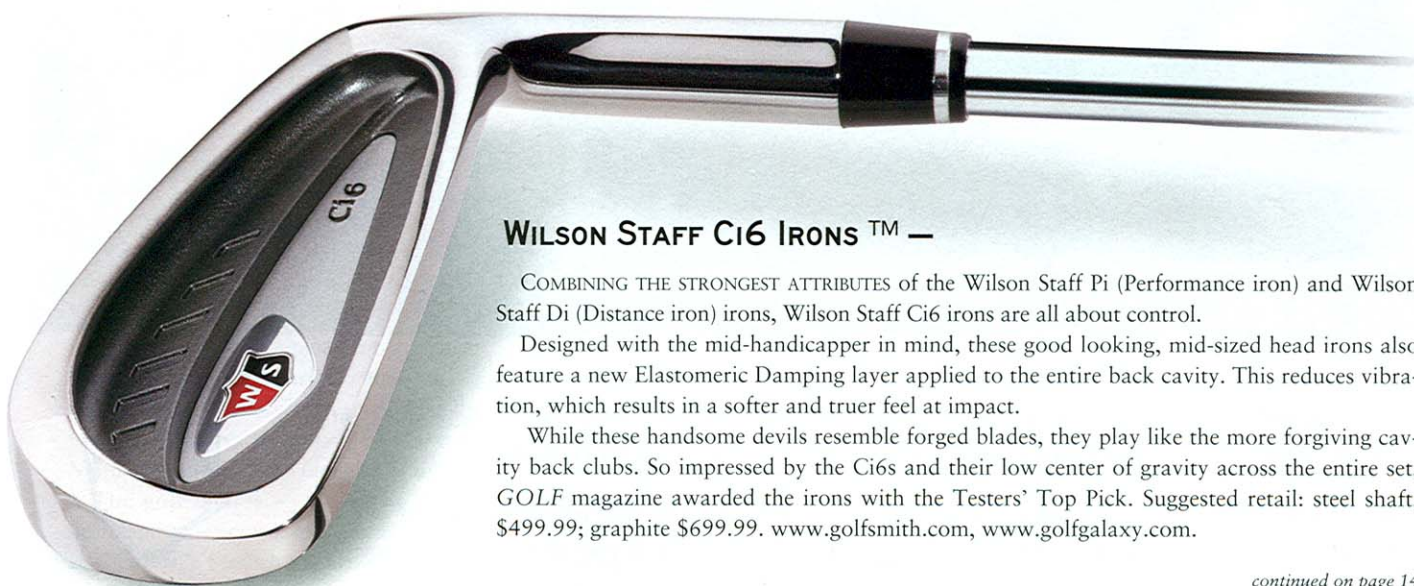

### CATBIRD™ CLUB CADDY —

DID YOU KNOW THAT OVER 5 MILLION CLUBS are lost each year? Forgetful golfers lay clubs down (especially around the green) then move on the next hole minus a club or two.

The Catbird from Guardian Golf is just the thing to help out. This lightweight club “perch” slides into the ground, providing a portable stand for golf clubs. The stand also keeps grips from getting wet, sandy and peppered with damp grass clippings.

Not sure which club to select when faced with uncertain fairway yardage and pin positions? With the Catbird you won't have to make a return trip to your bag — just prop up a few clubs and you're good to go.

Suggested retail: \$29.95. [www.guardiangolf.com](http://www.guardiangolf.com), 303-840-3100.

### WILSON STAFF CI6 IRONS™ —

COMBINING THE STRONGEST ATTRIBUTES of the Wilson Staff Pi (Performance iron) and Wilson Staff Di (Distance iron) irons, Wilson Staff Ci6 irons are all about control.

Designed with the mid-handicapper in mind, these good looking, mid-sized head irons also feature a new Elastomeric Damping layer applied to the entire back cavity. This reduces vibration, which results in a softer and truer feel at impact.

While these handsome devils resemble forged blades, they play like the more forgiving cavity back clubs. So impressed by the Ci6s and their low center of gravity across the entire set, *GOLF* magazine awarded the irons with the Testers' Top Pick. Suggested retail: steel shaft, \$499.99; graphite \$699.99. [www.golfsmith.com](http://www.golfsmith.com), [www.golfgalaxy.com](http://www.golfgalaxy.com).

## Stroke Shaving Ideas and More

### THE P3PROSWING™ —

WHO DOESN'T WANT A LOWER HANDICAP? Utilizing this swing analyzer could just lead to scorecards envied by those in your foursome.

The P3ProSwing combines a golf simulator with a swing analyzer that tells you precisely what your club is doing as you swing through the impact zone.

Graphics in the state-of-the-art golf simulator are exceptionally life-like, allowing for golf course flyovers, tracking of ball flight and replays of each shot.

Created by a team of enthusiastic golfers, golf pros, scientists and engineers, this in-home or in-office simulator is as technologically advanced as it is practical as a learning tool. Instant feedback reports just how much to correct each aspect of your golf swing. Suggested retail: \$699.95. [www.p3proswing.com](http://www.p3proswing.com), 406-860-1796.

### HOT FIT BY HOTSTIX® —

YOU'RE IN THE MARKET FOR NEW IRONS or a new driver, but which brands are right for you?

A Hot Fit session keeps golfers from doing the eenie, meenie, miney moe. Employing extensive robotic and player testing, this system invites golfers to swing a "beta" club, which analyzes club head speed, posture and ball striking capabilities.

The Hot Fit database then determines which top three brands of clubs best suit your style of play, and it also makes recommendations as to your preferred club loft, shaft and even what ball to play.

At the end of the session you receive a detailed computer printout suggesting just the right equipment. Session price (30 mins.): \$50. Golfsmith in Golden, 303-278-0273; Englewood; 303-708-1858, Westminster, 303-426-7775.

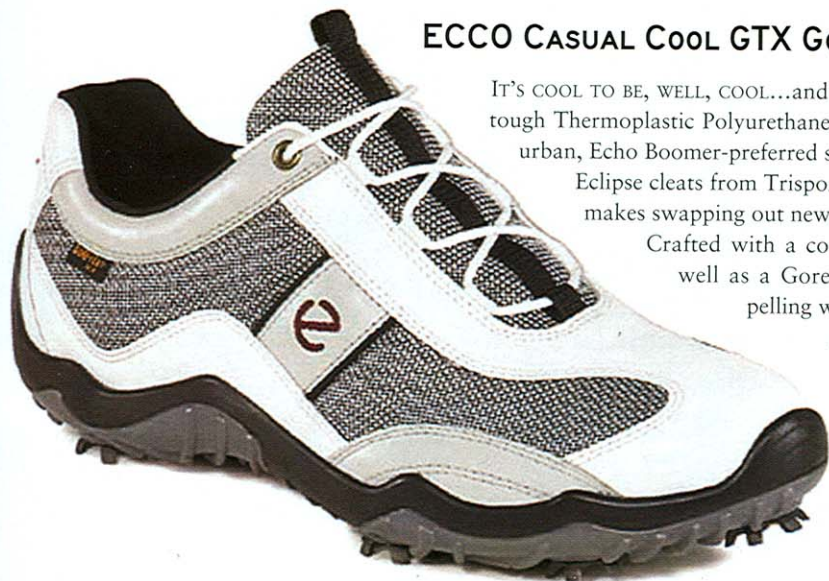

### ECCO CASUAL COOL GTX GOLF SHOE® —

IT'S COOL TO BE, WELL, COOL...and cool looking, too. This snazzy golf shoe features Hummer-tough Thermoplastic Polyurethane dual colored outsoles and a personality adapted from hip, urban, Echo Boomer-preferred street shoes.

Eclipse cleats from Trisport provide superior traction and the Fast Twist insert system makes swapping out new cleats as easy as a tap in.

Crafted with a combo of Hydromax leather and durable textile uppers, as well as a Gore-Tex waterproof membrane, the shoe is masterful at repelling water and it also resists perspiration.

A microfiber felt insole and ECCO Swing Stabilizer give feet something to cheer about, especially after walking 18! Suggested retail: \$169.99. [www.golfsmith.com](http://www.golfsmith.com), [www.golfgalaxy.com](http://www.golfgalaxy.com).
